The-five mile skating race at the tos to send abroad. Central Park skating rink, which took place Saturday night between Mullen and Hartman, was won by the former; time twenty-seven minutes. There was a large crowd present which cheered the skaters. There was some talk of an unknown skater, who intends challenging the winner of Saturday night's race.

The races at Kapiolani Park on Christmas Day were won as follows: The trotting race for a purse of \$500, between Captain Cluney's "Joe Dake" and C. Brouse's "Treat" was won by the former in two heats; time, 2:481/2 and 2:501/2. The running race was won by Sam Parker's filly. The scrub race between C. K. Miller's colt and "Emma Square" was won by the

Last Saturday afternoon about halfpast two o'clock a silver bracelet was lost by a young lady between King's art store on Hotel street, and the Temple of Fashion on Fort street. The bracelet was ornamented with three bangles: one contained the name "Alice," and the remaining two repre sented a fan and a horse shoe. The bracelet is only valuable as a keepsake, and the finder will be suitably rewarded by leaving it at this office.

The Royal Hawaiian band will give a concert at Emma square this evening at half-past seven o'clock. following is the programme:

The Latest American Invention. THE VICTORY OF ELECTRICITY.

Since Electricity has been applied for lighting purposes, all efforts of inventors have been directed to construct a lamp for general domestic use. The reason why this problem has till now not been solved, is that none of the inventors could rid themselves of the idea of gas lighting, and that all have adhered to the system of producing the Electricity in some central place, or by large machinery, in stead of first laying down the principle that a Lamp which should ever become generally useful and popular, must be portable, like an Oil Lamp, and contain the generator of Electricity in itself, i. e., in the foot of the Lamp.

The Norman Electric Light Company has at last succeeded in completely realizing this ideal of Electric Lighting, and there is no doubt that this most important invention will bring about a complete revolution in all branches of lighting.

Our Electric Lamp needs neither Machinery, Conductors, nor any expensive outlay, and is neither complicated nor disagreeable in manipulation; all that is necessary is to refill it every four or five days with acid. The cost of lighting will be as cheap as gas (¼ cents of li and Kalua.
